Transition to ISO 20022 by 2025

Welcome to the world of ISO 20022, a global and open standard for financial messaging. This comprehensive standard revolutionizes payment systems worldwide, providing a common language and model for payment data. With higher-quality data and adaptability to changing needs, ISO20022 ensures higher-quality payments for all. The SWIFT community has made the decision to transition to ISO 20022 by November 2025, and we are here to help you navigate this cumbersome transition seamlessly.

The ISO 20022 Gap Analysis Advisory Service

Our ISO 20022 Gap Analysis Advisory Service is a crucial component in your journey towards ISO 20022 (MX messaging formats) compliance. Our expert team conducts a thorough analysis of the impacts that transitioning to ISO 20022 will have on your back-office and payment operations.

By identifying the areas where significant changes will occur, we provide you with a comprehensive report that outlines the challenges, opportunities and possible solutions ahead. This comprehensive report serves as a roadmap, guiding your organization through the migration process and facilitating informed decision-making.

The ISO 20022 Payments Conversion Hub Solution

In today's rapidly evolving financial landscape, being ISO20022 compliant is not a choice, but a mandate. Momentarily not only mandated by SWIFT for International Payments, but also mandated by many Central Banks for RTGS payments within their respective Domestic Clearing Networks. Our ISO 20022 Payments Conversion Hub plays a vital role in enabling financial institutions to adapt seamlessly to this new standard.

By facilitating the conversion of payment messages between the MT and MX formats, our ISO 20022 Payments Conversion Hub ensures seamless communication within the back-office and payments operations and different payment networks. Say goodbye to costly and time-consuming system development, as our ISO 20022 Payments Conversion Hub saves valuable resources, allowing you to stay ahead of the curve and remain competitive.

By conducting the ISO 20022 Gap Analysis before implementing the ISO 20022 Payments Conversion Hub, financial institutions can ensure that the hub is designed and configured to meet their specific requirements. The analysis serves, amongst other aspects, as a roadmap consisting of, eventually, the implementation of the hub, guiding the customization and configuration process. It helps determine the necessary mappings, transformations, and validations that need to be implemented within the hub to support ISO 20022 payment messages.

What is your next move?

Don't let the transition to ISO 20022 overwhelm you. Embrace the future of financial messaging with our SWIFT ISO 20022 Gap Analysis and ISO 20022 Payments Conversion Hub solution. Contact us today to ensure a smooth and successful migration that minimizes disruptions and maximizes the benefits of the new Global standard.
